LIVING LONG WHARF: Coastal Resiliency, Flood Protection, and Responsible Economic Planning

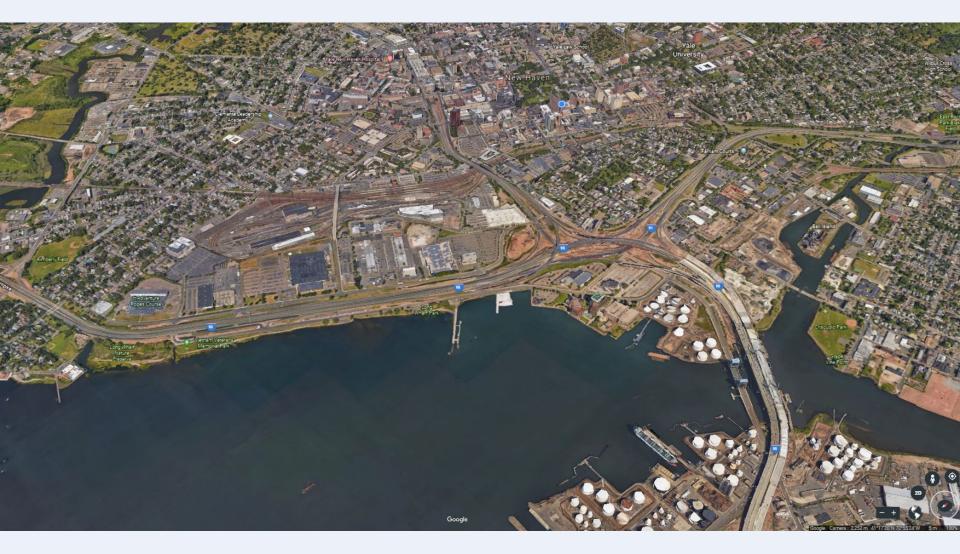

LIVING LONG WHARF: Coastal Resiliency, Flood Protection, and Responsible Economic Planning

Introduction to Panel

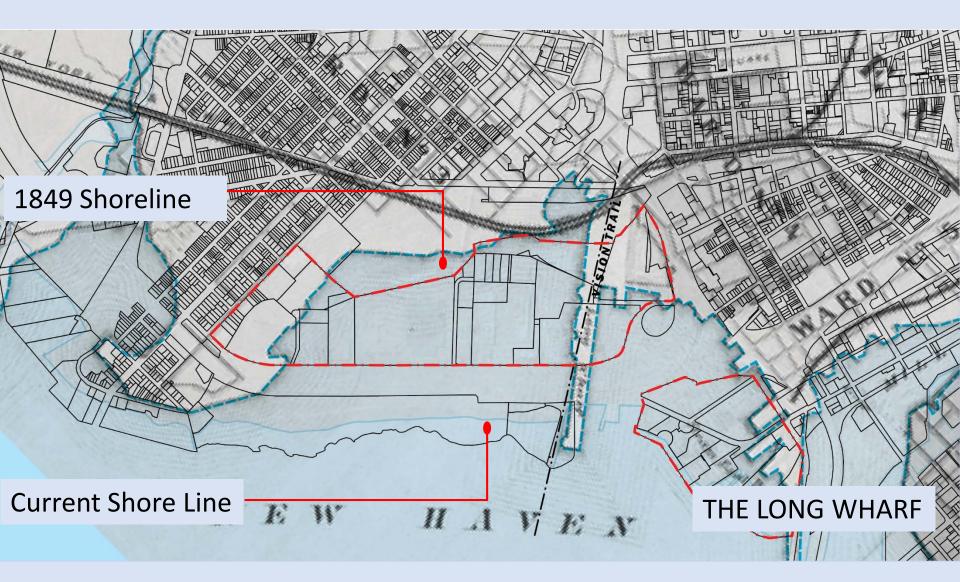

The Long Wharf Responsible Growth Plan aims to support the social and economic development of the Long Wharf District in New Haven through its strategic focus on coastal resiliency, progressive economic strategies and community engagement. This session will demonstrate how flood protection measures can be incorporated with sustainable development plans and offer big picture solutions by starting with incremental steps.

Donna Hall, Senior Project Manager, New Haven City Plan Department Hande McCaw, PE, Senior Project Manager/Coastal Engineer, GZA Eric C.Y. Fang, AIA, AICP, LEED AP, Principal at PERKINS EASTMAN

The Challenge:

4-Part Strategy:

Increase Capacity:

Install storage and provide more conveyance.

• Green Infrastructure:

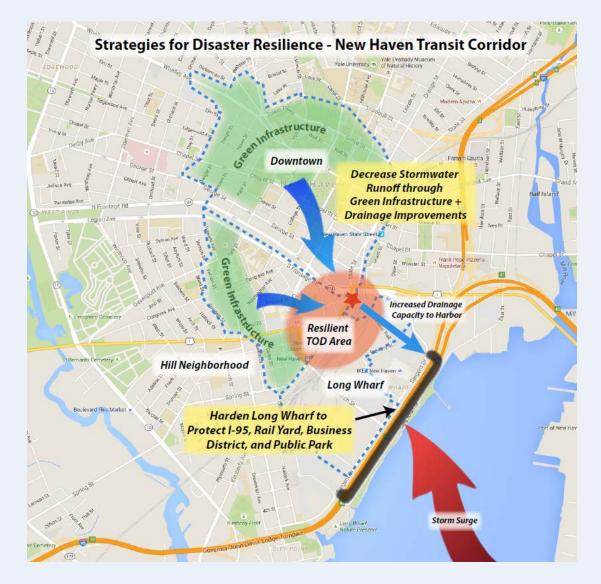

Reduce flow to problem areas by capturing and infiltrating rain where it falls.

• Flood Protection System:

Prevent storm surge from entering low-lying areas of concern.

• Living Shoreline:

Protect eroding shorelines while maintaining and improving natural habitat.

The Team:

AGENCY/COMPANY	ROLE
