Tidal and Non-tidal Scoring Breakdowns

<p>Ecological Benefit (1-5)</p> <p>E1. River Size E2. Length of River Reconnected E3. Number of Downstream Barriers E4. Aquatic Organism Passage</p>	<p>Transportation Benefit (1-5)</p> <p>T1. Road Functional Classification T2. Evacuation Route</p>
<p>Resilience Benefit (1-5)</p> <p>R1. Risk of Sea-Level Rise Inundation of Road R2. Risk of Storm Surge Inundation of Road R3. Heavy Rainfall Flood Risk within the Watershed</p>	<p>Infrastructure Condition Benefit (1-5)</p> <p>I1. Structural Condition I2. Partner Priority</p>

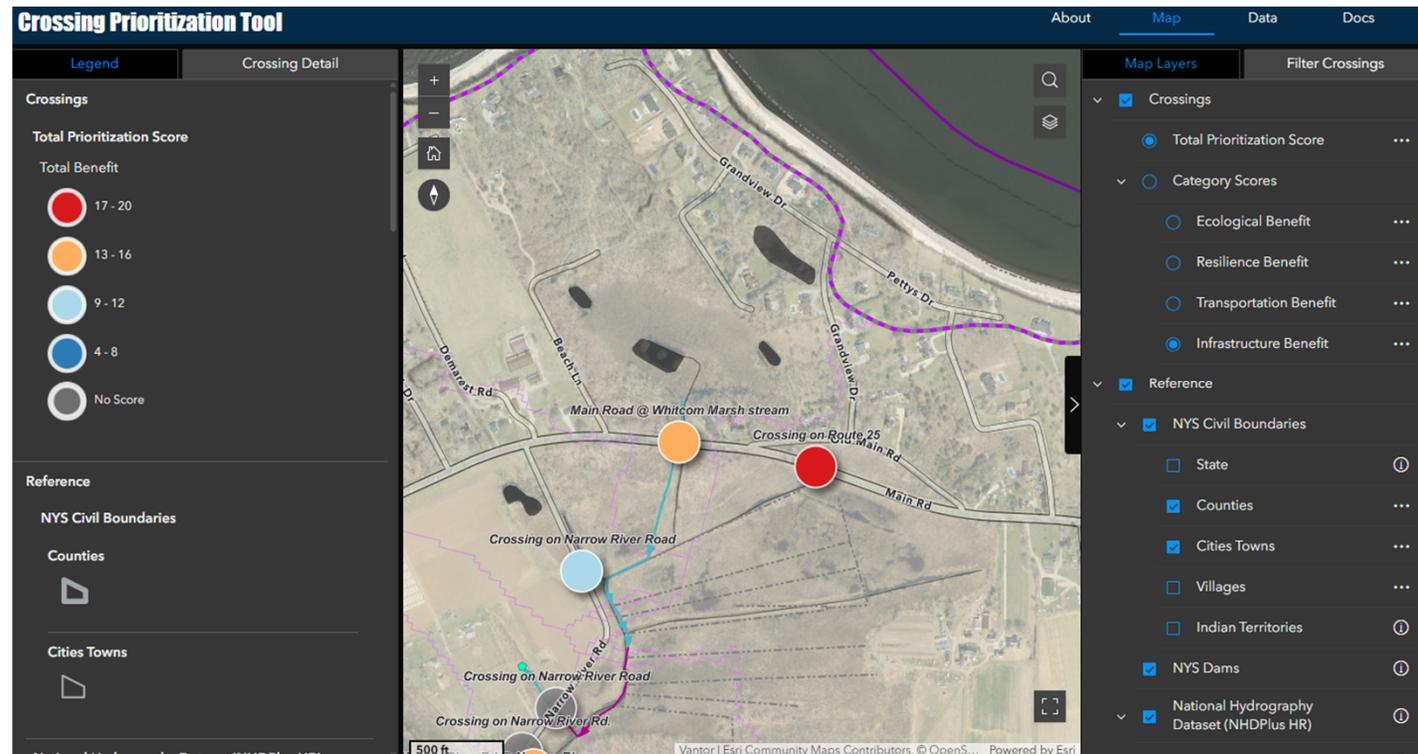

<p>Ecological Benefit (1-5)</p> <p>E1. Salt Marsh Complex Size E2. Salt Marsh Size Upstream E3. Degree of Tidal Restriction and AOP E4. Vegetation Score</p>	<p>Transportation Benefit (1-5)</p> <p>T1. Road Functional Classification T2. Evacuation Route</p>
<p>Resilience Benefit (1-5)</p> <p>R1. Risk of Sea-Level Rise Inundation of Road R2. Risk of Storm Surge Inundation of Road R3. Heavy Rainfall Flood Risk within the Watershed <i>R4. Area of Potential Tidal Marsh Advancement US of Restriction</i></p>	<p>Infrastructure Condition Benefit (1-5)</p> <p>I1. Structural Condition I2. Partner Priority I3. Risk of High Water – Lack of Clearance I4. Erosion Classification</p>

Slight Scoring Differences

- Suffolk County data came first in 2019
- Nassau County data in 2022
- Westchester County Data in 2024

Partner Priority (and getting municipalities to answer) can influence score.

Local knowledge of flooding and maintenance trouble spots are superior to tool results

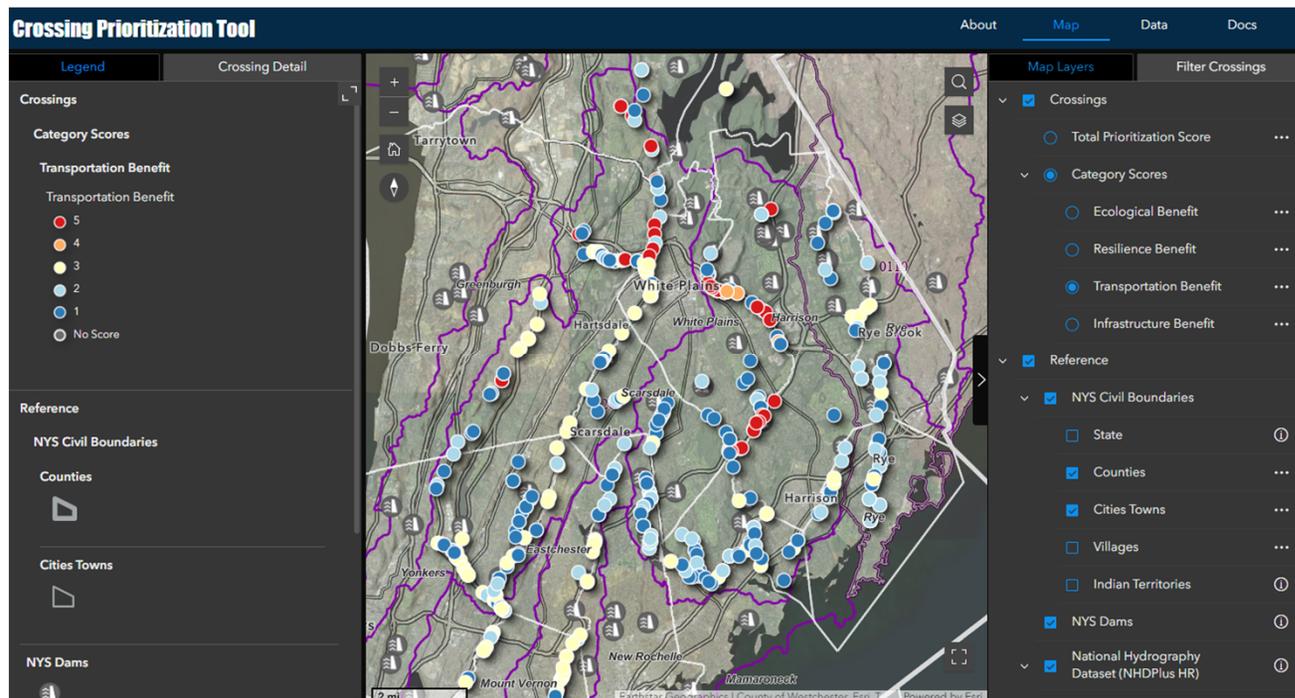

What's next?

- Demonstration webinars coming soon! (Winter 2026)
- Full tool will be migrated over to Save the Sound ArcGIS Online account
 - Tool uses approximately 700 credits/year

What's Next?

- No additions to the tool (for now)
- Save the Sound will be publishing web maps on ArcGIS Online where data can be downloaded
- Exploration of expansion into CT with a future funding source

Thanks to
our
partners!

Save the Sound[®]
Action for our region's environment.

Thank you!
